

PROSPECTIVE SUPPLIER CAPABILITIES SHEET

Integrated IT Support Inc.

Senior-led IT support, Microsoft 365 readiness, workflow automation, documentation cleanup, and scoped workplace technology services for small and mid-sized organizations that need controlled execution without overpromising.

OPERATING NAME Integrated IT Support	FOUNDED May 2023	LOCATION Whitby, Ontario, Canada
--	--	--

COMPANY OVERVIEW Practical operational improvement, led by enterprise-tested delivery discipline Integrated IT Support Inc. focuses on high-friction operational lanes where teams need reliable support readiness, cleaner workflows, stronger documentation, and practical Microsoft 365 or workplace technology help. IIS is founder-led and approval-gated by design, keeping delivery scoped, documented, and controlled. • Microsoft 365 support, cleanup, and readiness • Endpoint and user onboarding or offboarding readiness • Support runbooks, knowledge-base, and SOP delivery • Workflow automation and practical AI-assisted operations • Scoped workplace technology and office-readiness support	WHY IIS What makes the firm distinctive • Founder-led delivery backed by 15+ years of hands-on enterprise IT and operations work • Enterprise-tested process discipline shaped in regulated and high-accountability environments • Documentation-first handoff posture that reduces operational drift after delivery • Clear approval gates that avoid unsupported claims, surprise scope, or unsafe shortcuts
--	--

RELEVANT SERVICE LANES Where IIS is strongest	DELIVERY CONTROLS Risk-aware execution posture
--	---

• Microsoft 365 tenant cleanup, adoption, and support stabilization • Service-desk improvement, support-readiness, and escalation-note quality • Documentation cleanup, SOP creation, and knowledge-base delivery • Workflow automation for repetitive internal operational tasks • Small-scope website and intake-path improvement tied to lead capture or support flow	• Scoped work only • Documented handoff and operating notes • No unsupported compliance, staffing, or security-certification claims • Practical fit for workplace technology, support operations, and process cleanup lanes
--	---

CASE EXAMPLE

Founder-led prior enterprise delivery experience in regulated banking operations

Before IIS was incorporated, the founder delivered inside high-accountability financial-services environments that required controlled support, incident discipline, and executive-facing operational reliability. This example is included to show delivery context relevant to enterprise environments similar in size or governance pressure to major Canadian banks.

ENVIRONMENT Major Canadian banking and capital-markets operations	ROLE CONTEXT Team Lead, Major Incident Manager, executive IT and workplace support delivery	OPERATIONAL FOCUS Incident reduction, executive support continuity, workflow discipline, and support-process improvement
---	---	--

- Worked inside live financial operations where downtime carried real business risk and support quality had to hold under pressure.
- Applied Six Sigma and ITIL service-management discipline to reduce recurring operational failures and improve support consistency.
- Handled executive-facing and high-trust support work requiring documentation quality, escalation clarity, and process control.

Transparency note: this case example reflects founder-led prior enterprise delivery experience before the incorporation of Integrated IT Support Inc. in 2023. It is not presented as a direct CIBC engagement or as a post-incorporation IIS contract of equivalent bank-wide scope.
