Section 1: Introduction & Organization Overview

1.1 Purpose

Uncommon Schools, Inc. (Uncommon or USI) is issuing this Request for Proposals (RFP) for cost-effective IT managed services to meet the business and operational needs of its schools, regional teams, and Home Office (HO). Uncommon is conducting a competitive procurement process to evaluate the market and identify the best managed services partner for the organization going forward. All vendors will be evaluated equally under this process.

Uncommon Schools, Inc., in its capacity as the Charter Management Organization ("CMO") across affiliated schools, is managing this public competitive contract opportunity on behalf of and representing the respective needs of all affiliated schools, LEAs, regions, and offices as listed in Appendix A, and in accordance with the applicable procurement requirements for public charter schools in the states of New Jersey, New York, and Massachusetts and through the federal Department of Education under the following provisions:

- Federal Procurement Code Uniform Guidance (2 CFR Part 200.317 et seq.)
- New Jersey Public School Contracts Law (6A:23A-22.5, N.J.S.A. 18A:18A-1 et seq.)
- New Jersey Administrative Code (N.J.A.C. 5:34 et seq.)
- Uniform Procurement Act under Massachusetts General Laws (Chapter 30b), only where applicable to Commonwealth Charter Schools
- NY State Charter School Law (Article 56, Education Law sections 2850-2857)

Specific to North Star Academy Charter School of Newark and Camden Prep Renaissance School in New Jersey, the Qualified Purchasing Agent ("QPA") and/or an approved delegate for each LEA has been consulted in the writing of this RFP and will participate in the evaluation of qualifying offers to ensure compliance with New Jersey procurement requirements and school interests. Specific to Roxbury Prep Charter School in Massachusetts, the MCPPO and/or an approved delegate has been consulted in the writing of this RFP, will be present at the proposal opening, and will participate in the evaluation of qualifying offers to ensure compliance with Massachusetts procurement requirements and school interests.

Scope of services includes but is not limited to:

- a. Enterprise Infrastructure Administration and Maintenance
- b. Cloud Software and Device Management
- c. Security and Compliance
- d. End User Support
- e. On-Site Support
- f. Classroom Technology Support
- g. End User Device Management
- h. Printer Management

- i. Documentation and Inventory Management
- j. Systems Design and Recommendations
- k. Business Continuity and Disaster Recovery Planning
- l. Project Management Services
- m. Multi-Vendor Support and Advocacy

1.2 About Uncommon Schools

Uncommon Schools is a nonprofit charter management organization that operates 63 locations across 5 regions: New York City, NY; Newark, NJ; Camden, NJ; Rochester, NY; and Boston, MA. Uncommon serves approximately 20,000 students and employs approximately 2,800 staff across its school network and Home Office. Uncommon utilizes a dual leadership model where Principals manage instructional staff and focus on coaching while Directors of Operation manage operational staff and focus on the school's daily operation. A full list of locations, staff, and students is available in [Appendix A](#).

Uncommon's mission is to start and manage outstanding urban public schools that close the opportunity gap and prepare low-income students for success in college and beyond. Our schools serve students in grades [PreK–12], and our technology environment must support the full complexity of that mission — from classroom instruction to school operations to home office functions.

City	Staff	Students
Brooklyn, NY	~1,110	~7,800
Newark, NJ	~6,800	~835
Rochester, NY	~3,050	~360
Boston, MA	~210	~1,200
Camden, NJ	~1,560	~225
New York, NY (network office)	~275	n/a

1.3 Strategic Context

Our strategic ambition is to lead the best and highest-performing PK-12 schools in the nation — closing the college completion gap, providing a path to economic freedom, and extending our impact to students nationally and around the world. As one of the largest school systems in the country, achieving this requires that every operational decision support what happens in classrooms.

Reliable, secure, and scalable technology infrastructure is a prerequisite for academic excellence. This procurement reflects that priority. We are seeking a managed services partner with deep technical expertise, demonstrated experience in large PK-12 environments, and the operational capacity to support an organization of our scale and complexity.

1.4 Key Outcomes

The key outcomes of this procurement include:

- Cost efficiency — Demonstrated value relative to current spend, with transparent pricing and measurable return on investment
 - Capability alignment — A vendor whose core competencies match the scope and complexity of services required
 - Contractual accountability — Clearly defined service expectations, performance standards, and remedies for non-performance
 - Operational reliability — Consistent, school-centered technology support that minimizes disruption and enables student and staff success
-

Section 2: RFP Process & Timeline

2.1 RFP Calendar

Event	Date
RFP Issued	May 13, 2026
Offeror's Conference	May 27, 2026 at 2:30pm Eastern Time
Deadline for Written Questions	May 29, 2026
Responses to Questions Posted	June 2, 2026
Proposals Due	June 23, 2026 at 3:00pm Eastern Time
Proposal Opening	June 23, 2026 at 3:00pm Eastern Time
Finalists Notified	August 2026
Finalist Presentations	September 2026
Target Date for Vendor Selection	October 30, 2026
Target Contract Start	July 1, 2027

By submitting a proposal, the Offeror warrants that it has reviewed and agreed to the timeline for award and contract start date set forth above.

2.2 Offeror's Conference

Uncommon Schools will host a virtual Offeror's Conference for all Offerors. Participation is strongly encouraged but not mandatory. The conference provides an opportunity for Offerors to ask questions about this RFP, clarify scope and requirements, and ensure a shared understanding of the procurement process before proposals are submitted. All Offerors will receive the same information regardless of attendance.

Date and Access

Detail	Information
--------	-------------

Date	May 27, 2026
------	--------------

Time 2:30pm Eastern Time

Format Virtual

Duration Approximately 90 minutes

Access Meeting ID: 936 8765 3670

Zoom Link: <https://uncommonschoools.zoom.us/j/93687653670?from=addon>

Agenda

Time	Topic
2:30–2:45	Welcome, introductions, and procurement process overview
2:45–3:30	RFP document walkthrough — scope of services, technical environment, pricing structure, and evaluation criteria
3:30–3:50	Open Q&A
3:50–4:00	Closing remarks, next steps, and written Q&A deadline reminder

Important Rules

- All invited Offerors will participate in the same session simultaneously. Separate sessions will not be held.
- Oral responses provided during the Offeror's Conference are for clarification purposes only and do not constitute a formal amendment to the RFP. Only written questions and written answers are binding.
- Questions raised during the conference must be submitted in writing through the process described in Section 2.3 by the written Q&A deadline in order to receive a formal, binding response.
- All written questions and Uncommon's responses will be compiled into an addendum and distributed to all Offerors simultaneously, including those who did not attend the conference.
- Where a question or clarification requires a change to the RFP, a formal addendum will be issued. Offerors are responsible for reviewing all addenda issued during the proposal window.

Preparation

Offerors are encouraged to review this RFP document thoroughly prior to the Offeror's Conference and to come prepared with specific questions about scope, technical requirements, pricing structure, and submission requirements. The conference is most valuable when Offerors arrive with focused questions that go beyond what is already addressed in the document.

2.3 Q&A Process

All questions regarding this RFP must be submitted in writing by email to the designated project contact listed on the cover page, no later than the written Q&A deadline listed in Section 2.1. Questions submitted after this deadline will not receive a response.

Questions must be submitted in writing via email with the subject line: Uncommon Schools RFP # 2026-06-USI — Q&A Submission. Uncommon will not be bound by verbal responses to questions at any stage of this process.

All written questions and Uncommon's responses will be compiled and distributed to all Offerors simultaneously as a formal addendum to this RFP, regardless of which Offeror submitted the question. Addenda will be distributed via email to all invited Offerors. Offerors are responsible for reviewing all addenda before submitting their proposal.

Where a question or clarification requires a change to the RFP, a formal written addendum will be issued. Written questions, responses, clarifications, and changes will all be published publicly alongside the RFP under "Current Legal Notices and Documents" at uncommonschools.org, northstaracademy.org, and camden-prep.org. It is the Offeror's responsibility to check for updates

Uncommon shall not be bound by any oral interpretation or clarification of RFP documents at any stage of this process.

2.4 Submission Instructions

Offerors shall submit one (1) electronic copy of their written proposal in PDF format to the email address listed on the cover page. Cost proposals (Appendices A and B) must be submitted electronically in MS Excel and a signed PDF format separately from the written response.

Proposals must be received no later than the closing date and time listed above. Late proposals will not be accepted.

All proposals must include the RFP Cover Sheet with an authorized signature. Proposals received without a signed cover sheet may be disqualified.

Uncommon is not responsible for the Offeror's failure to send the proposal prior to the allotted time or for any technology issues, internet access failure, or other circumstances that cause a vendor's proposal to be sent or received beyond the date and time set forth herein.

More detail on submission guidelines and instructions is found in Section 10.

2.5 Proposal Opening

Uncommon Schools will host a virtual Proposal Opening for all Offerors. Participation is strongly encouraged but not mandatory. Uncommon will not open any Proposal prior to the beginning of this meeting. All submitted Proposals will be publicly acknowledged and accounted for to maintain transparency.

2.6 Uncommon Rights

Uncommon reserves the right to:

- Reject any or all proposals, or waive any irregularities or informalities
- Issue subsequent Requests for Proposals
- Award the contract in part or in whole
- Cancel or amend this RFP prior to the proposal due date
- Appoint a selection committee to review proposals
- Seek the assistance of outside technical experts in proposal evaluation
- Approve or disapprove the use of particular subcontractors
- Establish a shortlist of Offerors eligible for finalist presentations
- Negotiate with any, all, or none of the Offerors

- Award a contract to one or more Offerors
- Choose not to award a contract if not in Uncommon's best interest
- Award to the vendor that, in Uncommon's opinion, is most responsive and responsible; price alone will not be the determining factor

2.7 No Contact Policy

Once this RFP has been issued, vendors, contractors, or their representatives shall not communicate with any Uncommon staff other than the designated project contact listed on the cover page. Any such communication shall disqualify the vendor from responding to this RFP.

Uncommon staff, other than the designated project contact, shall not communicate with vendors or their representatives about this procurement once the RFP has been issued.

2.8 Alternative Proposals

Offerors submitting conforming proposals may also submit alternative proposals as complete, separate offers if the alternative proposals offer technical improvements or modifications that are to the overall benefit of Uncommon. Alternative proposals must be clearly labeled as an alternate and clearly describe the differences between it and the main proposal. Uncommon reserves the right to accept or reject any alternative proposal.

2.9 Proposal Binding Period

By submitting a proposal, each Offeror agrees that its proposal shall remain valid and may not be withdrawn for a period of one hundred twenty (120) calendar days after the proposal closing date and time.

2.10 Availability of Funds / Funding Out Clause

The obligations of Uncommon under any award resulting from this RFP are subject to the availability of funds lawfully appropriated for this purpose. Uncommon may, during the contract period, terminate or discontinue services at the end of its then-current fiscal year upon sixty (60) days prior written notice to the selected vendor, provided that:

- The lack of appropriated funds is the reason for termination; and
- Uncommon agrees not to replace the terminated services with services of similar function from another vendor in the succeeding funding period.

No agreement will be considered that does not include this funding-out provision.

Section 3: Scope of Services

3.1 Overview

USI is soliciting proposals for the following service areas. Vendors may propose for one or both areas of service. If submitting a joint proposal, one vendor must be designated as the primary vendor and will be responsible for the relationship with all other vendors listed as sub-vendors. Vendors shall include in their proposal evidence that their organization meets the requirements stated below. The evidence can include but should not be limited to the examples listed in each section.

- **Enterprise Managed Services:** Infrastructure administration, systems management, cloud services, security, and compliance
- **End User Service and Support:** Service desk support (phone and ticket-based), on-site technical services, and device management and support

3.2 E-Rate

All services covered by E-rate funding are not included in this RFP. Any E-rate services will be covered by a separate proposal to maintain compliance with FCC program guidelines.

3.3 General Service Requirements

The following general service requirements apply across all service areas:

- All prices must clearly delineate all costs and be line-itemized where applicable
- All managed equipment and associated infrastructure services must be monitored 24x7x365
- Uncommon's environment (including but not limited to all production network, servers and services) availability is expected to be 99.9% excluding scheduled maintenance
- All individuals assigned to this contract must submit to background checks at the vendor's expense and may only perform service upon successful clearance
- Uncommon reserves the right to refuse any individual from performing services under this contract
- The vendor is expected to provide appropriate representation at required meetings at no additional charge, including: ad hoc meetings, weekly status meetings, monthly meetings, quarterly emerging technology reviews with vendor senior leadership, and post-resolution meetings following system outages or emergency support
- USI will not be directly billed for ancillary costs including but not limited to: physical movement of equipment within a building, travel time, cell phone costs, office supplies, required background checks, attendance at meetings, transportation, overtime, and training or certification costs

- Sites may be added or removed at USI's discretion during the course of the contract
- All enterprise engineers must be certified in their respective fields (i.e. Microsoft, Cisco, etc.).

3.4 Enterprise Managed Services

The following minimum responsibilities are required to fully manage USI's environment through lifecycle management:

Monitoring/Management

- Dedicated operations center providing 24x7 monitoring and troubleshooting of any issues
- Provide capacity management for all core services including Active Directory, DHCP, DNS, and TCP/IP addressing
- Manage Active Directory domain controllers including OS updates, patching, and daily operations including user administration and password management across all locations
- Monitor and maintain the Active Directory forest; perform regular health checks and deliver monthly health check reports with corrective actions
- Provide recovery of services for incidents and outages
- Develop, improve, and maintain automated monitoring services, threshold monitoring, and alert notification
- Perform backup and recovery of all systems according to best practices for both on-premise and cloud systems
- Vendor will maintain a standard procedure for managing outages including owning communication to relevant stakeholders

Types of Evidence

- A communication plan for outages
- Example communication sent to stakeholders
- Your strategy to maintain AD
- Your NOC SLAs and SOP for outages
- The tools available to your NOC for monitoring and notifications

Design

- The vendor shall proactively design and engineer the infrastructure to maintain the highest practical levels of reliability and efficiency.
 - This includes evaluating current architecture, identifying improvement opportunities, and recommending and implementing changes consistent with Uncommon's operational needs.
- The vendor shall maintain a qualified engineering team with demonstrated expertise in Uncommon's environment.

- The vendor shall design, implement, and maintain a comprehensive security architecture that protects Uncommon's infrastructure, data, and users across all locations — including data centers, cloud environments and school sites
- The vendor will perform, as needed, changes and additions to the infrastructure to accommodate new services and devices
- The vendor will partner with Uncommon to recommend and implement infrastructure guidelines, standards, policies, and procedures

Types of Evidence

- Examples of network topographies you've designed, built and/or managed
- Examples of proposals you've made to help organizations mature their infrastructure and/or pay down tech debt
- Qualifications currently held by your network engineers

Asset Management

- Manage all infrastructure assets whether in the data center, in schools, or at remote location
- Maintain documentation of systems architecture reflecting the most current state of USI's on-premise, cloud, and school systems, accessible by designated USI staff that are managed by the vendor
- Maintain an accurate inventory of all equipment (e.g., switches, routers, servers, firewalls, etc) including production and spare units at all USI locations
- Manage the full lifecycle of all infrastructure components, including proactive firmware and OS updates to supported versions, tracking End-of-Life (EOL) dates, and facilitating replacement and procurement of new devices

Types of Evidence

- What asset management tools are available to your team
- Your strategy for keeping production networking equipment firmware/OS up to date
- Examples of documentation you maintain for other environments

Cybersecurity

The selected vendor must provide comprehensive cybersecurity services aligned with the NIST Cybersecurity Framework (CSF). This scope includes:

- 24/7/365 Managed Detection & Response (MDR): Continuous monitoring and triage of all managed endpoints, servers, and network infrastructure.

- Tenant Governance (Microsoft & Google): Operational management of security policies, conditional access, and other configuration for Microsoft 365 and Google Workspace as needed.
- Threat Remediation: Execution of remediation actions (e.g., investigating scope and severity, account lockdowns, policy adjustments, etc).
- EDR Operations: Full management of the Endpoint Detection and Response (EDR) stack, with defined authority to isolate infected endpoints immediately upon threat detection.
- Vulnerability & Lifecycle Management: Maintenance of a documented patching schedule for all OS and third-party applications, including an "emergency" track for Zero-Day exploits.
- Data Resilience: Management of an Immutable Backup solution for all servers hosted by the MSP, as described in the RFP with quarterly restoration testing to ensure recovery from ransomware or catastrophic data loss.
- Security Advisory (vCISO): Proactive recommendations for security posture improvements that balance K-12 regulatory requirements (FERPA/COPPA/NYS Ed Law 2-d) with public school budget constraints.
- Compliance Standard: The vendor shall maintain SOC 2 Type II certification and provide Uncommon with the most recent audit report annually.

Types of Evidence

- What security tools are available to your clients, both at the endpoint and at the network level?
- What backup systems do you employ for hosted and cloud-based servers and services?
- Your SOP for compromised machines and/or accounts
- Your OS patching philosophy/strategy

Identity and Access Management

- Process all staff account updates and changes (permission updates, name changes, location updates, etc) based on data sent daily from Uncommon
- Manage M365 licensing procurement and assignment
- Troubleshoot student access issues with Google and Clever and escalate to Uncommon as necessary
- All account management (including the vendor's own in regards to service and engineering accounts) should follow either the principle of least privilege or zero trust framework

Types of Evidence

- What identity providers you have expertise in
- What experience you have automating account creation and provisioning

Cloud Services

- Manage Google Workspace environment including app configuration, staff and student policies and integrations as requested by Uncommon IT
- Manage Microsoft environment including Azure/AD integration, exchange, staff policies and integrations as requested by Uncommon IT

Types of Evidence

- What integrations you've set up (e.g., Workday → Entra)
- What your strategy is for maintaining a certain security posture in a cloud based service like Google Workspace

Applications and Systems

- Maintain self-serve software portal for staff
- Maintain staff laptop image/configuration and conduct annual review with Uncommon
- Work with Uncommon D&IT to approve and implement platforms/services requested by users
- Partner in vetting and selecting new platforms/services
- Maintain and support two Sharepoint sites
- Maintain a VPN system for end users to access hosted resources while off-campus
- Manage and support our content based web filter

3.5 End User Service and Support

USI is requesting proposals for the support of USI-owned desktops, laptops, mobile devices, VOIP phones, peripherals, and end user support. USI is seeking a complete turnkey solution whereby the vendor manages day-to-day support functions in conjunction with USI oversight.

Key Requirements

- All individuals assigned to this contract must submit to background checks at the vendor's expense and may only perform service upon successful clearance
- On-site staff must adhere to USI dress code guidelines, which require business casual dress.
- Vendor must maintain an appropriate level of core staff that supports USI service performance goals, SLAs, and response times; staff placement will be mutually decided; every effort should be made to maintain the same core staff for the term of the contract; all staff changes require immediate notification to USI

- Vendor shall maintain an accurate inventory of all covered equipment in an electronic database readable by designated USI staff

Types of Evidence

- Your staffing levels in each region we operate in
- Your current SLAs and a recent performance analysis
- What inventory tools are available for endpoint devices

School-Level Service Delivery

Uncommon operates 52 schools across 5 regions. On-site services are a critical component of service delivery for the school network. The selected vendor must:

- Conduct scheduled on-site visits to each school on a regular basis (proposed frequency should be part of proposal)
- Coordinate all on-site visit scheduling with the school's Director of Operations (DOO), who serves as the primary school-level point of contact for MSP technicians
- Conduct on-site visits in a manner that minimizes disruption to the school day and reflects an understanding of the school environment
- Ensure that all on-site staff adhere to USI dress code and conduct guidelines and treat school staff, students, and leaders with professionalism at all times
- Manage and support all classroom technology, including WAPs, projectors, etc.
- Partner with regions to develop support plans and logistics for Computer Based Testing (state testing, AP tests, regents, SATs, etc)

Types of Evidence

- The types of classroom technology you are prepared to support, either fully or best effort
- Your current onsite schedule/frequency for other clients
- What training or qualifications your onsite engineers have
- Your support SLAs and/or escalation protocols

3.6 Project and Change Management

- Perform project work in school buildings during breaks and after hours (summer, winter and spring break as well as holidays)
- Provide clear criteria and definition of what constitutes a project vs. work that is included under the scope of the master agreement
- USI takes very seriously the education of its students and the impact of service interruption on end users, and therefore takes change management very seriously. The

service provider must detail their internal change control processes. All changes must be documented including:

- Scope of change and reason for change
- Communication plan
- Change testing and validation plan
- Risk assessment
- Implementation plan with measurable milestones
- Back-out and contingency plan, including conditions under which it must be implemented
- Plan and test results must be approved by USI prior to implementation
- Documentation of any problems encountered and deviations from the original plan
- Plan for post-change support
- Lessons learned

Types of Evidence

- Your change management process
- Examples of large scale projects you've performed in schools
- What project management resources (human and/or technology) are available to manage large scale projects
- What resources are available during breaks and after hours, when needed

3.7 Vendor and Contract Management

- Manage the relationship with our major technology partners including contracts, escalations, licensing and procurement:
 - Microsoft
 - Dell
 - Cisco
 - Juniper
 - SentinelOne
- Periodically, vendor will perform market research for ancillary services such as web filtering, spam filtering or cloud printing and make recommendations
 - In the cases where Uncommon decides to transition to a different provider for one of these ancillary services, the vendor will manage integration and configuration
 - The vendor will also manage any system updates and troubleshooting or escalation with the service provider as needed
- Partner with Uncommon on an as-needed basis to manage specific issues, implementations, and other vendor-related work

Types of Evidence

- A list of vendors you have an established relationship with

3.8 Staff Transition and Knowledge Management

- Document processes for knowledge transfer for staff transitions
- Produce, on demand, documentation for any processes pertinent to supporting the environment

3.9 Thought Partnership and Strategic Planning

- Provide actionable recommendations to enhance infrastructure and architecture with the goals of improving reliability, redundancy, and performance while reducing costs. Recommendations must be tailored to Uncommon IT's specific context and remain realistic within established budget constraints.
- Stay current on industry trends, emerging technologies, the evolving threat landscape, and provide timely guidance on how these developments may impact Uncommon IT's environment and/or create competitive opportunities.
- Develop and maintain a multi-year technology roadmap aligned with Uncommon IT's business objectives, revisiting and updating it no less than annually or as organizational priorities evolve.
- Gather and report on emerging technology trends in schools with context and recommendations for management (for example, bathroom vape detectors)

3.10 Vendor Onboarding and Offboarding

Onboarding

The selected vendor must provide a detailed onboarding plan that includes at minimum:

- Scope of work
- Communication plan
- Coordination plan with the current vendor (if applicable)
- Detailed schedule of activities
- Expected service interruptions, including anticipated dates and durations
- Risk analysis and risk register
- Knowledge transfer and training plan
- Resource management plan
- Documentation

Onboarding costs must be included in the cost proposal and listed as one-time fixed-price costs.

Offboarding

At the conclusion of any contract with USI, the selected vendor commits to the following offboarding obligations:

- Provide complete documentation of USI's environment, configurations, credentials, network diagrams, and asset inventories within 45 days of contract termination notice
 - Provide transition assistance for a period of 90 days following contract end, including cooperation with and support of any incoming vendor
 - Return all USI data in a usable format and certify deletion of vendor-held copies within 30 days of contract end
 - Take no action that would degrade service quality or harm USI's environment during the transition period
 - These obligations apply regardless of the reason for contract termination
-

Section 4: Technical Environment

4.1 Current Environment Overview

Uncommon's Information Technology Department encompasses Support, Engineering, Data Management, Business Intelligence, and Project Management functions.

Uncommon is primarily a Microsoft Windows environment. The current technology environment supports approximately:

Category	Count
Staff Laptops	~3,200
Student Chromebooks	~19,000
Total Staff	~3,000
Total Students	~20,000

Network Infrastructure

Our network is laid out as follows:

- Each school has at least 1Gb fiber for primary internet and telephony services
 - Each school has a 100Mb cable circuit for backup and guest network traffic
 - All traffic from every school and regional office is routed back to a data center in Virginia via EVPL and then to the internet via redundant firewalls
 - All traffic to hosted servers is routed to a New York data center which also has redundant firewalls
 - Each data center provides backup internet service for the other
-

Section 5: Vendor Qualifications & Requirements

5.1 Minimum Qualifications

The primary attributes USI seeks in a vendor include but are not limited to:

- Demonstrated, verifiable capability to provide support and maintenance services similar to those described in this RFP
- Company business and financial performance history consistent with solid, stable, and reliable operations over a multi-year period
- Existing, stable staff of highly trained professionals with a demonstrated successful track record of customer service and the technical skills necessary to support the products and services described in this RFP
- Experience providing managed infrastructure services for K-12, public, and/or government entities
- Experience providing on-site engineering for K-12, public, and/or government entities
- Experience providing Service Desk support for K-12, public, and/or government entities
- Understanding of federal funds solicitation guidelines and policies
- Proven record of implementing industry best practices, reducing costs, and increasing service levels
- Evidence of a comprehensive Equal Employment Opportunity (EEO) policy and a history of compliance with federal and state non-discrimination laws in hiring and subcontracting

5.2 Licenses, Certifications & Financial Requirements

- Each offeror and personnel performing services must be properly licensed to do business in applicable states New York, New Jersey, and Massachusetts
- Each offeror must complete all required forms at the end of this document
- Each offeror must submit with their proposal a copy of and maintain appropriate licenses and certificates during the term of the contract; failure to maintain these requirements shall be cause for immediate termination

5.3 Subcontractor Requirements

- The vendor shall notify Uncommon in writing if subcontractors will be used.
- The vendor shall list the portion of work each subcontractor is to perform and assume complete responsibility for that subcontractor's portion.
- No subcontractor may be engaged unless that subcontractor and each of its employees providing services certifies in writing agreement to guard the confidentiality of USI's

proprietary information to the same standard of care as binds the prime vendor under this contract.

5.4 Customer References

Please provide at least three (3) references for the services proposed. References must meet the following criteria:

- Services must have been provided within the last three (3) years
- All referenced organizations should have business processes and needs similar to or exceeding those of Uncommon in terms of functionality, complexity, and transaction volume
- At least one reference should be from a K-12 school or charter organization, serving 10,000 or more students across multiple sites.
- Additional references can be from organizations of at least 20,000 users with 5000 or more devices.

For each reference, provide:

- Customer name and address
- Contact name, phone number, and email
- Time period of engagement
- Services provided
- Number of students and school sites (if relevant)
- Number and type users supported
- Service Delivery Model (How did this reference receive service)

5.5 Staff Qualifications

Support Technician Minimum Qualifications:

- Knowledge of and experience repairing desktop, laptop, mobile devices, VOIP, peripherals, and related equipment
- Must have A+ and Net+ certification or equivalent work experience
- Must have a valid driver's license and ability to travel to any site within assigned region
- Ability to lift and/or move computer equipment
- Interpersonal skills necessary to work effectively with all levels of USI staff in a school environment
- Must pass Uncommon background checks
- Must be covered under the vendor's crime policy

Customer Service Desk Agent Minimum Qualifications:

- Strong decision making, problem solving, and analytical skills

- Strong organizational skills with emphasis on detail and follow-up
 - Ability to troubleshoot technology and connectivity problems
 - Positive attitude; ability to exercise patience and professionalism during stressful situations
-

Section 6: Vendor Questionnaire

All vendors must answer all questions. Robust answers including evidence and examples will score substantively higher than those without.

6.1 Company & Experience

- Q1. Describe your organization, ownership structure, size, and years in operation.
- Q2. Describe your current client-to-staff ratios and explain how your current operational capacity supports taking on a client of Uncommon's size (52 schools, ~2,800 staff) without degrading service to existing clients.
- Q3. How many K-12 school districts or charter school clients do you currently serve? List the school districts, their student population size, and the number of locations serviced.
- Q4. Describe your experience in states where Uncommon operates: New York, New Jersey, and Massachusetts.

6.2 Service Delivery Model

- Q5. Describe your service desk structure, including staffing model, hours of coverage, tier levels, and escalation paths.
- Q6. Describe your Network Operations Center (NOC) including connectivity/blend, HVAC, power, redundancy (2N power, N+1 blend/ac/battery/etc.), security and compliance, and fire suppression. Additionally, describe the staffing model and coverage for 24x7 monitoring and escalation paths.
- Q7. How do you manage and schedule on-site technician visits to school locations? How do you coordinate with school-level staff (e.g., Directors of Operations, Vice Principals, Office Managers)?
- Q8. Please share two to three examples of moderately complex user facing documentation with us that are representative of your documentation and communication style.
- Q9. Provide an example of how your team provided support to resolve an unexpected urgent issue. What was the scenario? How did the team approach getting to resolution? What was the solution proposed?
- Q10. Please share your current SLAs for both end-user support and NOC issues in a table similar to the one below. Provide SLA performance data from the past 12 months for at

least one comparable client, showing target vs. actual performance by priority tier. How do you measure, track, and report on SLA performance to clients?

Priority	SLA - Resolution	SLA - First Reply	Description
Outage	x hours	x mins	Wide scale business outage or significant impact to business; multiple sites/customers down. For example, a network or infrastructure systems are down, carrier outages, key servers down in the data center or high circuit utilization issues creating poor performance for majority of users.
Urgent	x business day	x hours	Time-sensitive issues important to productivity or causing a significant customer concern, and general single-user issues.
High	x business days	x hours	Issues that don't have a significant business impact include software installs or upgrades, report requests, quality issues on phones, and hardware fulfillment requests depending on vendor availability.
Normal	x business days	x hours	This includes adding new users, security group membership changes, distribution list membership changes, and user terminations.
Low	x business days		Billing issues, project updates (which should be updated a minimum of every 30 days), scheduled outages/maintenance with customers, and internal activities that are not customer affecting or generally time-sensitive.

6.3 Cybersecurity & Data Protection

A. Governance & Compliance

Q11. Provide proof of SOC 2 Type II or ISO 27001 certification. If you utilize a sub-service provider for SOC/MDR services, provide their certifications as well.

Q12. Describe the specific steps you take when onboarding a new New York K-12 client under Ed Law 2-d, including how you identify which of your tools and subprocessors

require disclosure. How do you handle a situation where a subprocessor you rely on does not have a compliant DPA?

Q13. Provide details on your Cyber Errors & Omissions insurance coverage limits. Confirm that your current coverage meets or exceeds the minimums specified in Section 9.2 of this RFP. If it does not, describe how you would address this gap prior to contract execution.

Q14. Describe the specific steps you take to bring a new K-12 client into compliance with NYS Ed Law 2-d, including the public posting requirement. Describe any gaps in your current compliance posture relative to NJ S332 and how you are addressing them. If a subprocessor you rely on does not have a compliant DPA, how do you handle that?

B. Monitoring & Threat Detection

Q15. Describe your SOC (Security Operations Center) model. Is it 24/7/365? Is it US-based?

Q16. Describe your MDR/EDR stack.

Q17. Define your SLA for:

- Critical Security Alert Detection
- Notification to USI IT Team
- Initial Threat Containment (e.g., endpoint isolation)

C. Vulnerability & Lifecycle Management

Q18. Describe your patching cadence for Critical, High, and Medium vulnerabilities. What is your process/strategy around "Zero-Day" exploits outside of the standard patch cycle?

Q19. What is your strategy for managing the security for non-standard endpoints (e.g., classroom IoT, interactive whiteboards, security cameras)?

D. Incident Response & Recovery

Q20. Describe the first four steps your team would take if Uncommon experienced a ransomware event at 2:00 a.m. on a school day. Who is notified, in what order, and by what method? At what point would you recommend involving law enforcement or a forensic retainer?

Q21. Describe your Immutable Backup strategy. How do you ensure backups are isolated and cannot be encrypted or deleted during a domain-wide compromise?

Q22. Define your commitment to RTO (Recovery Time Objective) and RPO (Recovery Point Objective) for core school systems.

E. Identity & Awareness

Q23. Describe the security framework and tooling your staff would use to secure, manage, and audit privileged access to Uncommon servers and network equipment. Does your organization enforce MFA or Zero Trust principles for privileged access? Do you utilize an Enterprise Privileged Access Management (EPAM) solution for storing and rotating privileged credentials? Detail your audit logging capabilities for all privileged access sessions.

Q22. How do you manage and enforce MFA across a dual-tenant (Microsoft/Google) environment? In a K-12 environment, what challenges do you see?

6.4 Communication

Q24. Uncommon Schools places a high priority on communication. Provide two examples of written communication you have sent to end users in the past year — one routine and one during an active incident or outage. Do not summarize them; include the actual communication but redact client information or other identifying or sensitive information.

Q25. Describe your communication cadence with school-level staff () during a non-urgent period. How do you ensure school leadership feels informed without being overwhelmed?

Q26. Describe a situation where a communication failure on your team's part caused or worsened a client issue. As a result, what corrective actions did you take to reduce the chance of communication failures?

6.5 Technical Capabilities

Q27. Describe your experience managing a K-12 Microsoft Windows/Active Directory environment of comparable scale to Uncommon's, as described in Section 4. What were the biggest challenges you faced and how did you manage them?

Q28. Describe your experience managing a Google Workspace environment including experience with the Admin Console, any scripting capabilities, experience managing the Directory, and experience with managing the user-lifecycle in light of changes to Google's licensing model.

Q29. List all tools and systems you would use to provide the services in this proposal, and indicate whether these are included in the cost proposal.

Q30. Describe your approach to infrastructure lifecycle management, including how you identify and recommend efficiencies and cost savings for clients.

Q31. Describe your approach to emerging technologies, including how you incorporate AI and automation into your service delivery.

6.6 Performance & Accountability

Q32. Describe a situation where you failed to meet a client's expectations and how you handled it.

Q33. Describe your escalation process when a client issue is not resolved within expected timeframes. Provide a specific example and include any internal debrief processes.

Q34. Describe a time you advised a client not to pursue a strategy they expressed interest in.

6.7 Transition & Onboarding

Q35. How will you know when you are fully onboarded?

Q36. Describe how you would approach knowledge transfer and transition from the incumbent vendor?

Q37. Describe in specific terms what your offboarding process looks like in practice. What does the documentation package you hand to an incoming vendor typically contain? What have been the biggest challenges you've encountered during a client transition, and how did you handle them?

Beyond the attributes and experience shared in the preceding answers, please describe and provide documentation to support any additional qualifications or services you offer that would bring value to Uncommon, and whether each is included in the submitted cost proposal.

Section 7: Pricing

7.1 Cost Proposal Instructions

Overview and Instructions

Proposal Structure: Proposers may submit pricing for one or both service areas. If submitting for a single area, complete only the applicable tab(s) in the workbook and leave the others blank. If submitting a joint proposal, the primary vendor must submit a single integrated cost proposal covering both areas, with all sub-vendors identified in the Assumptions tab.

Proposers must complete all required tabs of the Cost Proposal Workbook in their entirety. Incomplete cost proposals may be deemed non-responsive and disqualified from further evaluation.

The Cost Proposal is organized into two separately priced areas:

- Section A — Enterprise Managed Services
- Section B — End User Service and Support

Pricing for each area must be submitted as a fixed monthly recurring fee per service category, along with any applicable one-time or non-recurring costs. Year 1 pricing must be firm and fixed. Pricing for Years 2 through 5 must reflect either (a) firm fixed pricing or (b) a not-to-exceed annual escalation rate as specified on the Multi-Year Pricing tab of the workbook.

All fees quoted in this section are understood to cover the full scope described in Section 3 (Scope of Services) of this RFP, including all labor, materials, overhead, profit, and any other costs necessary to deliver the required services.

Cost Proposal Workbook

All cost proposal data must be submitted using the posted Microsoft Excel workbook: **Uncommon MSP RFP -Cost Proposal.xlsx**. Do not substitute alternative formats (**note:** a PDF of the cost proposal that includes the required signatures is required in addition to the Excel file). The workbook contains the following tabs, which must be completed as indicated:

Workbook Tab	Purpose
Summary	Auto-populates from all other tabs. Do not enter data here — review only.
A - Enterprise Managed	Section A pricing: monthly recurring fees for all infrastructure and managed service categories.
B - End User Support	Section B pricing: monthly recurring fees for service desk, onsite, device, and testing support.
Project Mgmt	Monthly PM retainer fee and/or hourly T&M rate schedule.

Workbook Tab	Purpose
Offboarding	Declare whether offboarding transition costs are included in base fees or priced separately.
Multi-Year Pricing	State escalation methodology for Years 2–5 (fixed rate or not-to-exceed % increase).
Assumptions	Required exhibit: staffing model, coverage hours, scope inclusions/exclusions, and other mandatory disclosures.

Cost Summary

The Cost Summary is generated automatically from Sections A, B, and C of the workbook.

Proposers do not enter data on the Summary tab. Annual totals reflect twelve (12) monthly recurring fees plus any applicable one-time costs for that year. Review the Summary tab after completing all detail tabs to confirm figures are accurate before submission.

Section A — Enterprise Managed Services & Project Management

Provide a fixed monthly fee for each service category on the 'A - Enterprise Managed' tab. Fees must reflect all staffing, management, tooling, licensing (where applicable), overhead, and service delivery costs for the full scope defined in Section 3.4 of this RFP. Annual totals and the 5-Year Total auto-calculate from the monthly fees entered. Enter Year 1 firm fixed monthly fees for each service category. Enter Years 2–5 fees or leave blank if using the escalation rate method on the Multi-Year Pricing tab.

Project Management Tab

Project and change management work performed outside of day-to-day managed service operations must be priced separately on the 'C - Project Mgmt' tab. This includes break-week projects (summer, winter, and spring), large-scale implementations, and changes subject to the formal change control process described in Section 3.6 of this RFP.

Proposers must clearly indicate on the workbook tab and in the Assumptions Exhibit whether project management is included in base monthly fees or priced on a time-and-materials basis. Proposers may not leave this section blank.

Enter the monthly PM retainer fee (enter \$0 if T&M only). Enter hourly rates for break-week, after-hours, and emergency project work — these rates will be incorporated into the contract.

Section B — End User Service and Support

Provide a fixed monthly fee for each service category on the 'B - End User Support' tab. Fees must reflect all staffing, scheduling, management, and service delivery costs for the full scope defined in Section 3.5 of this RFP. Onsite visit frequency must be stated in the Assumptions tab and should align with the proposed schedule described in the Scope of Services. Enter Year 1 firm fixed monthly fees for each service category. Enter Years 2–5 fees or leave blank if using the escalation rate method on the Multi-Year Pricing tab.

Multi-Year Pricing

Year 1 pricing must be firm and fixed for the initial contract term. For Years 2 through 5, indicate your pricing approach using one of the two methods on the Multi-Year Pricing tab of the workbook. Proposers may not leave multi-year pricing blank or state that pricing is “to be negotiated.”

Method 1 — Fixed Annual Pricing: Provide firm, fixed monthly fees for each year directly in the Section A, B, and C tabs.

Method 2 — Annual Escalation Rate: State the not-to-exceed percentage rate by which all fees will increase each year, not to exceed [INSERT CAP, e.g., 4% or CPI + 1%, whichever is less].

Note: Escalation rates must be applied consistently across all service categories. Mixed escalation rates are not permitted without written justification in the Assumptions tab.

Offboarding Costs

Section 3.10 of this RFP requires the selected vendor to provide 90 days of transition assistance, complete environment documentation within 45 days of contract termination notice, and return all USI data within 30 days of contract end. These are contractual obligations and not optional.

Proposers must declare on the Offboarding tab of the workbook whether these costs are included in the base monthly fee or will be invoiced separately. Proposals that do not address offboarding costs will be subject to clarification requests.

For each obligation, indicate Y (included in base fee) or N (separately priced) and provide the quoted cost if separately priced. The Summary tab pulls the total automatically.

Required Attachment: Assumptions Exhibit

Each Proposer must complete the Assumptions tab of the workbook as part of the Cost Proposal. The Assumptions Exhibit is a mandatory, scored component of the proposal. Proposals submitted without a completed Assumptions tab will be deemed non-responsive.

The Assumptions tab must address all required elements for each proposed service area. Stated assumptions establish the scope baseline from which contract adjustments and offboarding obligations will be administered.

Complete all required exhibit elements. Address staffing model, coverage hours, geographic coverage, volume assumptions, scope inclusions and exclusions, cybersecurity tooling, escalation methodology, offboarding cost treatment, and key subcontractors.

Proposers may also include additional assumptions in the designated section at the bottom of the Assumptions tab. Additional assumptions may provide context for proposed pricing — for example, dependencies on USI, transition conditions, or environmental prerequisites. However, additional assumptions may not exclude, reduce, or redefine any obligation stated in Section 3 (Scope of Services) of this RFP. USI reserves the right to seek clarification on any assumption prior to award.

7.2 Pricing Requirements

- All prices must clearly delineate all costs and be line-itemized by service category
 - Vendors must itemize any one-time costs (e.g., transition-in costs) separately from recurring costs
 - Vendors must describe the cost driver (e.g. # of users, device count) used to determine the Monthly Recurring Charge
 - Vendors must identify any services not included in the base proposal and provide pricing for those services separately
 - Price is one determining factor in the contract award; Uncommon is seeking the best overall value
-

Section 8: Evaluation Criteria

8.1 Evaluation Process Overview

Proposals will be evaluated through a two-phase process:

Phase I: Written Proposal Evaluation All proposals will be reviewed for completeness and compliance. Compliant proposals will be scored by the Vendor Selection Committee using a normed numerical rubric Vendors may be asked to clarify specific sections; responses to clarification requests will be included in the overall scoring.

Following Phase I, the Vendor Selection Committee will identify a shortlist of finalist vendors who will be invited to participate in Phase II.

Phase II: Finalist Presentations Finalist vendors will be invited to deliver formal presentations to the Vendor Selection Committee. Presentations will be evaluated using a scorecard that includes both the criteria from Phase I and presentation-specific criteria including team quality, communication, and demonstrated understanding of Uncommon's environment.

Following presentations, the Vendor Selection Committee will conduct reference checks on finalist vendors before making a final recommendation.

8.2 Evaluation Criteria & Weights

Proposals will be scored based on the following criteria:

Category	Weight
Proposed Solution & Technical Requirements • Technical & Cybersecurity Capability (20%) • Infrastructure Management (15%)	35%
Cost & Value	25%
Vendor Qualifications & Experience • Service Delivery Model & Responsiveness (10%) • School Environment Fit (10%)	20%
Strategic Alignment & Capacity • Strategic Partnership & Thought Leadership (10%) • Communication & Transparency (10%)	20%

8.3 Preliminary Evaluation

A preliminary evaluation will determine whether each proposal is complete and compliant with the instructions in this RFP. Proposals that are incomplete or do not comply with the instructions or terms and conditions may be rejected and excluded from further consideration.

Proposals which include limited responses to requirements such as "concur" or "will comply" without substantive explanation will receive lower scores than proposals that demonstrate a genuine understanding of the requirements and include specific plans to meet or exceed them. Detailed scoring descriptors for each criterion are maintained internally by the Vendor Selection Committee and are not published as part of this RFP.

8.4 Basis of Award

Uncommon is seeking the vendor proposal and demonstrated services that will deliver the highest quality services most closely aligned with the goals and direction of Uncommon, while delivering the best value with all factors considered. The Vendor Selection Committee will present its recommendation to Uncommon IT Leadership for approval.

Following the complete evaluation process, Uncommon will begin contract negotiations with the chosen vendor.

Section 9: Contract & Legal Requirements

9.1 Overview

The selected vendor will be required to execute a contract with Uncommon Schools, Inc. Uncommon will prepare and negotiate a contract with the selected vendor. The RFP document, the vendor's proposal, and the Terms and Conditions in Section 10 are all considered part of the final agreement.

Uncommon reserves the right to add terms and conditions during contract negotiations, provided they are within the scope of the RFP and do not affect the proposal evaluation.

By submitting a proposal and entering into a contract, the vendor warrants that it has read and understands the requirements set forth herein and agrees to comply with all stated requirements and provisions. The vendor further understands that the contract will be between the vendor and Uncommon on each school's behalf and general invoices will be submitted to Uncommon. However, each school may avail itself of the pricing and services set forth in the agreement directly as needed and, subject to the contract's requirements, vendors may be asked to provide such services directly. All pricing and services will be in accordance with all applicable purchasing laws, rules and regulations depending on the individual school's location.

9.2 Required Contract Provisions

The selected vendor must agree to the following as conditions of contract:

- **Performance against the SLAs:** SLAs will be evaluated at the end of each calendar month. Each SLA will be evaluated independently. Uncommon may terminate the contract due to repeated failures to meet SLAs.
- **FERPA Data Processing Agreement:** The selected vendor will execute a FERPA-compliant data processing agreement that explicitly governs the handling, storage, access, return, and deletion of student data. The vendor must sign the Parents' Bill of Rights and a Supplemental Information form.
- **COPPA Compliance:** Vendor warrants that all services comply with the Children's Online Privacy Protection Act (COPPA). Vendor shall only collect student data for the School's educational purposes and shall not use such data for any commercial or secondary purpose.
- **State data privacy compliance:** The selected vendor must comply with all applicable federal and state student data privacy laws, including New York Education Law § 2-d and Part 121 regulations, the New Jersey Student Online Privacy Protection Act (A4978), the New Jersey Data Protection Act (S332, effective January 2025), and Massachusetts Student Records Regulations (603 CMR 23.00). Vendors should note that New York § 2-d requires execution of a Data Privacy and Security Agreement that

will be posted publicly on Uncommon's website, and that vendor contracts will include breach notification timelines more stringent than the standard 30-day window. State-specific data processing agreements will be required as a condition of contract award.

- **NJ Political Contribution Disclosure:** For services impacting New Jersey entities, the successful Offeror must submit a Chapter 271 Political Contribution Disclosure Form at least ten (10) days prior to contract award. Failure to provide this disclosure timely may disqualify the proposal.
- **Insurance minimums:**
 - **Commercial General Liability (CGL):** \$2 million
 - **Errors and Omissions:** \$2 million per occurrence / \$4 million aggregate
 - **Technology Cyber Liability** (see sub-bullets): \$3M per occurrence / \$5 million aggregate
 - Data breach notification costs
 - Ransomware/extortion payments
 - Regulatory defense and penalties (FERPA-relevant)
 - Third-party liability for client data exposure
 - **Workers' Compensation:** As required by applicable law in New York, Massachusetts, and New Jersey
 - **Commercial Auto Liability:** \$1 million combined single limit
 - **Additional Insured:** Uncommon Schools must be named as an additional insured on the CGL and cyber policies.
 - **Waiver of Subrogation:** Required on all applicable policies.
 - **30-day notice of cancellation:** Vendor must notify Uncommon if any policy is cancelled or materially changed.
 - **Certificate of Insurance:** Delivery is required within 10 business days of contract execution, and annually at renewal.
 - **Umbrella/Excess Liability:** \$2 million umbrella/excess liability coverage
- **Offboarding and transition obligations:** The primary obligation during offboarding is to ensure uninterrupted operational services for Uncommon Schools. The vendor must provide all necessary transition support for a minimum of 90 days post-termination, cooperating fully with the designated successor vendor until Uncommon confirms operational handover is complete. This assistance includes the prompt return of all USI data in a usable format and a written certification that all vendor-held copies have been permanently deleted within 30 days following the contract end.
- **Background check compliance:** All individuals, including any subcontractors, assigned to perform services under this contract must pass Uncommon Schools criminal background checks at the vendor's expense prior to performing any services at Uncommon locations.
- **Indemnification:** The Vendor shall assume all risk of, and responsibility for, and agrees to indemnify, defend and save harmless Uncommon Schools, each member school at any specific site at which work under the Agreement is being done, and the agents, employees and members of each, from and against any and all claims demands, suits, actions, recoveries, judgments, and costs and expenses (including but not limited to,

reasonable attorney's fees) in connection with loss of life or property or injury or damage to any person, body or property, which arise from, or result directly or indirectly from: (i) the work and/or materials supplied under the contract; (ii) vendor's or any subcontractor of vendor's intentional or negligent acts or omissions; or (iii) the vendor's or any subcontractor of vendor's violation of , or failure to comply with, any applicable law, statute, rule, regulation, ordinance or code which results in, or has the potential to result in, any adverse finding or penalty assessed against Uncommon Schools or its member schools by any government agency or subdivision thereof. This indemnification obligation is in addition to and not limited by the insurance obligation contained in the agreement.

9.3 Vendor Management & Governance

The selected vendor agrees to the following ongoing governance requirements:

- Designate named account contacts for the Uncommon relationship, including a primary account manager and technical escalation contact
- Participate in regular governance cadence including: weekly operational check-ins, monthly performance reviews, and quarterly strategic reviews with vendor senior leadership
- Provide monthly SLA performance reports to USI IT leadership in a format approved by USI
- Notify USI immediately and in writing of any changes to key account personnel

9.4 Offer Protests

Any Offeror wishing to protest the award of this contract must submit a written protest to the Project Manager within five (5) business days of the notification of award. Uncommon Schools will review the protest and issue a final written decision.

Section 10: Submission Requirements

10.1 Proposal Format

Proposals must be organized in the following order, with sections clearly labeled:

- Section 1: RFP Cover Sheet (signed)
- Section 2: [Form A: Proposal Response Form](#)
- Section 3: Table of Contents
- Section 4: Executive Summary
- Section 5: Technical Proposal
- Section 6: Forms [B](#) and [C](#)
- Section 7: Questionnaire Answers
 - If your answers include any confidential materials, label as such and redact as needed to protect privacy
- Appendix A: Separately: Cost Summary (MS Excel format and signed PDF)
- Appendix B: Separately: New Jersey required Forms 1-11 (downloaded separately)

10.2 Submission Deadline & Method

Proposals must be received no later than **Tuesday, June 23, 2026 at 3:00pm Eastern Time**.

Submit electronically to: mnp.rfp.2026@uncommonschoools.org Subject line: Uncommon Schools Managed Services RFP # [2026-06-USI]

Written proposal: PDF format

Cost proposal: MS Excel (submitted separately) and signed PDF of the cost proposal

Late proposals will not be accepted. Proposals received by telephone or fax will not be accepted.

It is the responsibility of the offerors to monitor the publishing locations listed in Section 2 and review all published addenda and include all relevant responses and information in the proposal.

There shall be no charge for the preparation of proposals.

The proposals will be publicly opened via virtual conference on June 23rd, 2026. A link to the opening conference will be provided to all Offerors who submitted a proposal via separate email. Interested parties may also request the link to the conference by emailing mnp.rfp.2026@uncommonschoools.org at least twenty-four (24) hours prior to the date on which the proposal opening is scheduled. In accordance with New Jersey public records law, except

for designated proprietary information, each proposal will be made available to the public or any interested vendor for review upon request.

10.3 Proprietary Information

Any portion of the proposal that the Offeror considers confidential or proprietary must be explicitly marked as such on each pertinent page and segregated from the remainder of the proposal, accompanied by an executed Non-Disclosure Agreement for Confidential Materials.

A statement that the entire proposal is proprietary is not acceptable and will result in a request to remove such a statement before the proposal can be evaluated.

All proposals become the property of Uncommon.
